Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 1 and 8 are rejected under 35 U.S.C. 102(e) as being anticipated by Teshima '342. See e.g., FIGs 1a and 1b and the associated discussion appearing in the BACKGROUND section.

Claim Rejections - 35 USC § 103

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
4. Claims 2, 3, 6, 7, 9, 10, 13 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Teshima as applied to claims above.
 - a. Regardless of whether Teshima discloses the additional structures or specific compositions recited in these claims, their respective uses in conjunction with micro-lenses were well known to those of ordinary skill in the art at the time of the invention. It would have been obvious to such skilled artisans to have employed them for their conventional purposes.

Response to Arguments

5. Applicant's arguments filed 9/28/04 have been fully considered but they are not persuasive.

a. Applicant has amended the independent claims to recite that the micro-lenses are manufactured to be purposefully larger and/or taller than the first set of micro-lenses.

Applicant has also argued that this amendment overcomes the rejection because the Teshima reference teaches that the variation in the micro-lenses' shapes and size is not purposeful, but rather an unwanted by-product of inferior manufacturing process.

b. However, since it was known that the formation of micro-lenses resulted in unwanted size differences, the choice to employ the Teshima process constitutes a conscious decision to manufacture the lenses such that the second set of micro-lenses is "purposefully" (albeit undesirably) larger and/or taller than the first set."

c. More importantly, in light of the well-established product-by-process and intended-use doctrines, the examiner recommends Applicant amend the claims towards any potential distinctions that are structural in nature as opposed to distinctions relating solely to the underlying processes or intentions.
